March 3, 1999

Mr. Weisberg:

I found an interesting article in "The Chicago Reader" about the firing of Dr. Lundberg and Dr. Crenshaw's lawsuit against JAMA about their 1992 report on the autopsy of JFK.

The article also mentions a book that came out last year: Assassination Science: Experts Speak Out On The Death of JFK. I was wondering your thoughts on that.

There was really nothing to send about the release of the Zapruder film last year. I may have to take a trip to the public library to do some digging so you may be getting some more articles later.

I hope you and Lillian are doing well!!!

Sincerely,

Andy Schatner
